8.4 mi.

The Arizona Trail Association is building 32 miles of non-motorized trail to eliminate paved and dirt roads the Arizona Trail currently follows between Harshaw Road Trailhead and Walker Basin Trailhead. Until the entire project is complete, segments will be opened as they are finished. Take a photo of this map and use it to find your way on out-and-back, loop, or long-distance trail adventures. To support this major trail building project, contact the Arizona Trail Association online at aztrail.org.
